

XM radio has saved me time. I have driven on the 95 corridor in the NE and I can get traffic reports from NYC to DC. I can use this information then re-route and avoid the problems areas. I don't have this with regular radio nor do I know the correct stations in each area. It would be more waste and more angry folks as they sit in traffic when it could have been avoid because of the convient features of XM radio. This little feature makes people happy. Sitting in traffic on the 95 corridor or major roads in the NE does not make us happy. Please keep the traffic and weather. It is a welcome, safe, and very needed feature in our daily and hectic lives.

Thank you
